

DESCRIPTION

PRODUCT COVERED:

Thermal Protector, Type ST-22.

RATINGS:

* 125/250 V, 1/2 Hp, maximum 150 °C.

GENERAL CHARACTER AND USE:

This is an inherent overheating protective device, automatic reset type, intended to be mounted within fractional horsepower motors.

* The protector was examined and investigated to determine compliance of its limited short-circuit test performance with regards to the Standard for Overheating Protection for Motors, UL 2111.

This Report is intended to be used in eliminating the standard limited short-circuit test where applicable when the device is submitted to the Laboratories in combination with motors.
