

## PPW series (1mV/1mA, with USB or RS232 interface)

### Introduction

PPW series is a high accuracy programmable DC power supply with single output. MPU control, RS232/RS485/USB interface for PC control, the PPW series facilitates auto test and auto control. The commands of the PPW series are compliant with SCPI commands. Users can easily develop programs to facilitate different applications in auto test and auto control. Digital input fulfilled by rotary dial and keypad input, fast and accurate. Voltage and current regulations by software, avoids human error and makes the PPW series more accurate.
