5.9	P.C.B FRONT LIGHT PIPE		 <p>The diagram shows a cross-section of the encoder assembly. On the left, a cylindrical component is labeled 'Front-panel or light Pipe'. In the center, a rectangular component is labeled 'Switch'. On the right, a vertical line represents the 'P.C.B'. Arrows point from the labels to their respective components in the assembly.</p>

: 0.82 .		
FLUX : P.C.B 2/3 .		
 <p>The graph shows a temperature profile for auto soldering. The y-axis represents temperature in degrees Celsius, with marked values at 150, 200, and 240±. The x-axis represents time in minutes. The profile starts at 150°C, rises to a plateau at 150°C for a maximum duration of 2 minutes. It then rises to a second plateau at 240±°C for a maximum duration of 10 seconds. The temperature then falls back to 150°C for a maximum duration of 40 seconds, and finally returns to 150°C for a maximum duration of 4 minutes.</p>
